RESPONSE TO DOES COMMENTS ON THE STANDARD OPERATING PROCEDURES FOR THE
IDENTIFICATION OF HABITAT TYPES AS REVIEWED BY ROBERT GANT OF HAZWRAP (3755)
- JEE-0069-91

Ref: (a) F. R. Lockhart, ltr (3755) to L. E. Woods, SOP Draft "Identification of Habitat
Types," May 10, 1991

The following are EG&G's responses to DOE's comments from HAZWRAP due May 24, 1991
on the Draft Identification of Habitat Types SOP. Although these comments were received on
May 29, 1991, we did manage to make the requested changes and they have been
incorporated into the Final Ecology SOPs.

General Comments:

Comment 1: Not clear whether habitat types presented in Section 6.2.1 are plant
communities previously identified or are representative of the general
area.

Response: These are plant communities previously identified at RFP and this will
be clarified.

Comment 2: Results of the habitat survey should be compared with the most current
surface geologic and soils maps of the RFP for possible correlations.

Response: Agree.

Specific Comments:

Comment 1: Recommendation to modify or delete second sentence in Section 2.0,
paragraph 2, as it does not contribute to the purpose and scope.

Response: It will be deleted.

Comment 2: The need to indicate the appropriate procedure for grouping and
identifying habitat categories.

Response: This will be clarified.
